

MAP EXPLANATION

Faults mapped by Moore (1981), dashed where approximately located, dotted where concealed; bar and ball on downthrown side of normal fault.

Faults mapped by Slemmons and students (1970).

Locality referred to in text.

Fault is well-defined and/or was verified as exhibiting geomorphic evidence of latest Pleistocene to Holocene displacement by Bryant (this report).

NV Fault is not well-defined or was not verified as exhibiting geomorphic evidence of latest Pleistocene to Holocene displacement by Bryant (this report).

Key to faulted and unfaulted deposits

□ -deposit offset H -Holocene L -late Pleistocene
○ -deposit not offset Q -Quaternary b -bedrock

Figure 2b (to FER-203). Independence fault zone in the western Owens Valley study area, based on available mapping of others. Faults highlighted in yellow are recommended for zoning for special studies.
